

- Backend Developer & AI Engineer · 8+ Years
 - Microservices, REST APIs & Distributed Systems
 - Cloud-Native Apps with Python, Java & Node.js
 - LLM Integration, RAG & Vector Databases
 - Generative AI & Intelligent Automation
- Secure, Scalable & Maintainable Solutions
 - Lead Projects from Concept to Production
 - Open Source Miner · Remote Contractor
 - Based in Selangor, Malaysia

SKILLS

Mobile / Desktop Apps

- Android, Java, Kotlin
- iOS, Swift
- React Native, Ionic Framework, Flutter, Dart, Electron
- C++, **Reverse Engineering**

Web

- React, Next.js, Vue, Nuxt.js, Tailwind CSS
- Laravel, CodeIgniter, WordPress, Magento 2
- Django, Flask, SpringBoot, REST APIs
- AWS, Firebase, Supabase, n8n
- PostgreSQL, MySQL, MongoDB, Redis
- Docker, Kubernetes, Cloudflare, Nginx
- Web3, DeFi, Cryptocurrency

Artificial Intelligence

- **Bittensor**, PyTorch, TensorFlow, Keras, YOLO
- Hugging Face, LLM, RAG, Rasa
- LangChain, LangGraph, LlamaIndex
- Vector Databases, pgvector, Prompt Engineering
- OpenAI, Anthropic, Claude, Gemini, Mistral, Ollama
- FastAPI, gRPC

Tools

- Cursor, VS Code, Claude
- Xcode, Android Studio, Visual Studio
- Docker Desktop, Postman, Google Chrome
- Figma, Adobe Photoshop, Git, Vercel
- Trello, Notion, Jira
- Slack, MS Teams, WhatsApp

EXPERIENCE

Open Source Miner & Contributor	2026.4 - Present
Bittensor Network - SN74 Gittensor	
- Mining on Bittensor's SN74 Gittensor subnet by contributing merged PRs to whitelisted open source repositories, earning TAO alpha token emissions based on code quality and credibility scores. - Contributed bug fixes and feature improvements to hot repositories, including resolving credibility display mismatches, dependency conflicts, and memoization bugs in Rails-based financial dashboards. - Managed Bittensor wallet infrastructure using btcli, including coldkey/hotkey configuration, TAO deposits, and subnet registration on the Bittensor mainnet.	
Senior AI Backend Engineer	2025 - 2026
ABC Digital Solutions Sdn Bhd	
Malaysia	
- Designed and developed AI-powered backend services using Python, FastAPI, and LangChain. - Implemented Retrieval-Augmented Generation (RAG) solutions utilizing vector databases and large language models. - Built scalable microservices architecture deployed on AWS using Docker and Kubernetes.	
Senior AI Backend Engineer	2024.1 - 2025.3
ABC Digital Solutions Sdn Bhd	
Malaysia	
- Developed secure RESTful APIs supporting over 500,000 monthly transactions. - Optimized backend performance, reducing API response times by 40%. - Integrated OpenAI and enterprise AI models into customer-facing applications. - Led a team of 6 engineers delivering AI automation projects across finance and e-commerce sectors.	
Backend Software Engineer (Remote)	2021.1 - 2023.12
TechVision Systems Sdn Bhd	
Malaysia	
- Developed enterprise backend systems using Java Spring Boot and PostgreSQL. - Designed microservices and event-driven architectures supporting high-volume transactions. - Built API integrations with payment gateways, ERP systems, and third-party platforms. - Implemented CI/CD pipelines using Jenkins, Docker, and GitLab; reduced infrastructure costs by 25% via containerization.	
Software Engineer (Remote)	2018.6 - 2020.12
Innovate Technologies, Inc.	
Malaysia	
- Developed web applications and backend services using Python, Node.js, and MySQL. - Created REST APIs for mobile and web applications; built reporting and analytics modules for BI platforms. - Automated manual workflows, improving operational efficiency by 30%; maintained security, DB performance, and availability.	
Freelance Web Developer	2017.9 - 2018.5
CrowdWorks.jp	
Japan	
- Developed and delivered custom web applications for Japanese clients through CrowdWorks.jp, focusing on responsive UI and performance optimization. - Collaborated remotely with Japanese clients to translate business requirements into scalable technical solutions. - Successfully completed multiple freelance projects (Fixed and Hourly) while maintaining high client satisfaction and meeting strict deadlines.	
Junior Freelance Web Developer	2015.11 - 2017.7
Upwork.com	
United States	
- Worked as a junior freelancer on Upwork.com, contributing to website development, bug fixing, and UI enhancements across multiple client projects. - Assisted in translating client ideas into functional web solutions using the MEAN stack; gained experience in remote collaboration and agile practices.	

EDUCATION

Bachelor of Science (Hons) in Computer Science	
University Malaysia of Computer Science & Engineering (UNIMY)	2012 - 2015
